Dear Sarju,

It will work from Test Bed. Not from regular browser from personnel devices.

Best Regards,
Pradeep Sharma

Hi Pradeep,

So, I understand that if I hit this URL as such, and I change number to say Rajneesh/Pradeep number, and message is simple hi, it will be sent from the Test server.

I will try this from the browser. You may receive a message.

Regards
Sarju

Dear Sarju,

ani=Facebook

dnis=855183333868

these parameter will be required to change for specific usage. We can try on International number as well.

Best Regards,

Pradeep Sharma

Thanks Rajneesh,

Do the partner provided any API document which list down the meaning of each parameter and output ?

<http://62.210.57.190:8001/api?command=submit&ani=Facebook&dnis=855183333868&username=GlobalC&password=hmjjbuks&message=%3C%23%3E%2018372%20is%20your%20Facebook%20code%20Laz%2BnxCarLW&channelid=12982&longMessageMode=split>

What value should be passed in each parameter ? For me, two parameter are relevant - dnis which contain the mobile number starting with MCC code and message which seems to encoded.

I hope this URL will work for both national and international numbers. We can test on one of your local numbers once we have the above details.

Regards
Sarju
